PROFESSIONAL SUMMARY

Computer Science (Honours) student building full-stack apps powered by machine learning, with three ML projects deployed live, from data cleaning and model evaluation to REST APIs and Docker. Experienced with Python, FastAPI, React, scikit-learn, LangChain and PostgreSQL. Seeking a Summer 2027 co-op in software development or machine learning.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS
AI/ML: scikit-learn, Pandas, LangChain, spaCy (NER), Tesseract OCR, Gemini API, RAG
Frameworks/Libraries: React, Vite, FastAPI, Pydantic, Node.js, Express, Tailwind CSS, Bootstrap
Databases: PostgreSQL, MySQL, Firebase, ChromaDB (vector database)
Cloud & DevOps: Docker, Vercel, Render, Neon, Git, GitHub, continuous deployment from GitHub
Tools & Practices: REST APIs, Agile/Scrum, Azure DevOps (Boards), Trello, VS Code, Figma

PROJECTS

Receipt Scanner | *React, FastAPI, PostgreSQL, Tesseract, spaCy, Docker* | Live Demo

- Extracts store, date, total and items from receipt photos using OCR and a custom spaCy NER model
- Designed layered fallback parsing (NER, rules, fuzzy matching) to handle OCR errors and domain shift
- Fit a 512 MB memory limit by moving to Tesseract; fixed a production 502 outage (blocking OCR call)

RAG Chatbot | *React, FastAPI, LangChain, Gemini API, ChromaDB* | Live Demo

- Built a full-stack RAG chatbot that answers questions from user-uploaded PDFs
- Designed the ingestion pipeline (1,000-character chunks with 200 overlap, Gemini embeddings, ChromaDB) and a top-3 retrieval chain with LangChain (LCEL)
- Grounded answers in the document with an "I don't know" fallback to reduce hallucination

Customer Churn Predictor | *Python, Pandas, scikit-learn, FastAPI, React* | Live Demo

- Served a Random Forest model via a FastAPI REST API; reached 78% accuracy against a 73% majority-class baseline and identified low churn recall (45%) as the key gap
- Cleaned 7,032 records, caught hidden null values, and applied one-hot and label encoding
- Evaluated with precision, recall, F1 and a confusion matrix, and tuned risk thresholds (0.5 High, 0.3 Medium) to the model's probability range

Driver Monitor System (Capstone) | *React, JavaScript, Node.js, Express, Firebase*

- Built the React frontend and designed the Firebase database for a real-time drver monitoring app

EXPERIENCE

Customer Service Associate (Part-Time) | *Shell, Waterloo, ON* Aug 2024 – Present

- Serve 50+ customers per shift in a fast-paced retail environment while studying full-time
- Resolve transaction and service issues on the spot, communicating clearly with a diverse customer base

EDUCATION

Bachelor of Applied Computer Science (Honours) | *Conestoga College* 2024 – Expected Apr 2028

Relevant Coursework: Parallel Computing, Software Security, Software Quality, Big Data, Advanced Software Development

Web Development & Internet Applications Fundamentals | *Conestoga College* 2023 – 2024

CERTIFICATES

The Complete Python Bootcamp From Zero to Hero in Python – **Udemy (2026)**
The Complete Full-Stack Web Development Bootcamp – **Udemy (2026)**
